

REMARKS

Applicants note with appreciation the allowance of this case in the Notice of Allowance mailed February 26, 2007. In the course of preparing the application for grant, applicants have reviewed the specification and claims and have found that the above errors require amendment.

Several spelling and typographical errors have been corrected in the specification and in claim 26. Also, in specification paragraphs 0063, 0064 and 0073, item 20" has been corrected to 20' as shown in the drawings. There is no item 20" in the drawings, and the error is believed to have been introduced during the PTO's conversion program used in electronic filing of the application.

In the Notice of Allowance, the restriction requirement against claims 5, 11, 22 and 23 was withdrawn, and these claims have now been indicated as being active, original claims.

This amendment to the claims does not require a new search and is not a substantive change from conceptual considerations. Accordingly, it is respectfully submitted that the present amendment be entered under the provision of 37 CFR 1.312 and such action is respectfully solicited.

At this time, the issue fee has not been paid.

Respectfully submitted,

Peter W. Peterson
